Chimney and Flue Fires

You may be thinking about organising your flu shot, but are your chimneys and flues ready for winter?

Each winter, fire fighters attend many house fires due to ash, soot and combustion residue that has built up inside chimney flues. This residue can ignite causing a fire. In most cases you will see flames shooting out of the top of the chimney!

To make sure your chimneys are ready, we recommend you:

- Check the heater, fire place brickwork, chimney and flue *before* lighting your first fire of the year to make sure it is clean.
- Look at purchasing some additives you can put in your fire while its burning that can help reduce residue build up (check out your local hardware store).
- If your fireplace chimney is brick, check that the surrounding brickwork has not cracked. This can reduce the chance of a fire creeping through the course in back wall.
- Ensure that your wood heaters are installed and maintained by a qualified operator.

House fires can cause extensive property loss and damage. Most of these are accidental and preventable – so take action now to minimise your risk. For more information on Chimneys and Flues visit www.dfes.wa.gov.au and you can also download the [Home Heating Safety](#) factsheet. Talking about: The Accomplice

This is the story of one of the most shocking events of the seventeenth century: the wreck of a Dutch ship, the *Batavia*, off the west coast of Australia, and the extraordinary events that befell its stranded survivors. It is also the story of Judith Bastiaansz, sailing with her family to a new life, who is caught up in something well beyond her experience: first infatuation and then, perhaps, something far more dangerous. Combining a gripping narrative with vivid historical detail, this is a beautiful, terrifying, deeply moving novel of love and anarchy.
